

Siddharth Village,

Jatni- 752 050 Orissa

(Bhubaneswar is the main airport and Siddharthvillage is located at 20th km from the airport)**Perspective:**

Looking at leadership and management training today, often, personal leadership and self-management are missing elements. Effective leadership has less to do with organizational skills, and more with personal leadership and motivation. Personal leadership and self-management relate to knowledge and skills on a personal level, especially personal attitude, one's purpose in life and values. For this reason, leadership and management begin at the personal level. If you desire to set up a healthy business and contribute to bringing change in society, the motto is to start with yourself.

The focus of this Leading for Change programme is on entrepreneurs (preference for women) who are interested in doing business beyond the traditional notion of maximizing profit towards social change. The program is value driven.

The Leading for Change in social business programme is an adapted version of Leadership and Management Dynamics (LMD) programme, which has been developed by Vision Quest Africa and has been conducted more than 80 times in different countries since 1994
